

Atlas Copco GX and GA Series Info

THE GX SERIES

This series incorporates proven Atlas Copco industrial rotary screw technology, providing optimum performance, high reliability, long lifetime and reduced maintenance requirements. Total integration of refrigerant dryer, compressed air filters and air tank results in a complete compressed air system, including all connections and outlet valve, in less than 1m² (<15kW). Combined with low noise levels, down to 61 dB(A), this makes the GX the perfect compressed air solution for workshops and light industry. GX 2 – GX11 hp range from 3 to 15hp

Flexibility in design, covers every type of installation.

• Full Feature variant (FF)	Including an integrated refrigerant dryer, ensuring clean and dry air at all times
• Pack variant (P)	All the benefits of Atlas Copco experience in design and manufacture of industrial compressors are combined in the GX series.

THE GA SERIES

GA series, small in footprint.... big in performance The GA units are delivered to the site equipped with oil and are ready to go. To start the operation, just connect the compressor to its power source.

- . Available as Pack, WorkPlace® and Full Feature versions
- . Includes a superior electronic control, monitoring and communication system

. Absolute reliability	Designed and manufactured in accordance with ISO 9001 and ISO 14001 certification. The GA'S conform to the ISO 1217, ed.3, Annex C - 1996 test code.
. High efficiency	Equipped with the unique Atlas Copco's patented screw element, a high efficiency drive system and an intelligent control system resulting in a superior performance.
. Low maintenance costs	Designed to be service friendly with direct and easy access to all components. Wear and tear and the need for spare parts are reduced to an absolute minimum.
. All-in-one packages	All air and condensate treatment equipment can be integrated into the compressor package, thus reducing installation costs and floor space requirements to a minimum.
. Global sales and service organization	From concept to installation, from advice to preventive maintenance and service activities, Atlas Copco is your compressed air partner helping to maintain your production process.
. Comes in many different sizes	20-30hp = GA15-22 15-40hp = GA11+-30 40-125hp =GA30+-90 125-675hp =GA90-500
.Variable Speed Drive Sizes	20-40hp =GA18-30VSD 50-125hp =GA37-90VSD 175-350hp =GA132-315VSD
